Reason to enter in to a Business

Any person who has started their own business will tell you it is not an easy thing to do but to also add the fact that you are providing a service you have no experience in will make this process twice as hard (if not impossible).

Even experienced recruiters starting their own agency understand it may be 3-6 months before they will make adequate placements to cover their costs so by having to learn this skill at the same time as running the business will extend this even further.

How has this business changed your life?

The most important part of a recruiter's job is finding the perfect candidate to fill that job. Ok so it may take a lot of phone calls, meetings, and emails until you find them, but how great does it feel when you have taken someone through the whole recruitment process then secured them their dream job?

Knowing that you've helped change someone's life for the better is an amazing feeling, and the satisfaction you get from this doesn't get much better.
